EXPERIENCE

Kainos Group plc

Work Experience Placement

Belfast, United Kingdom

February 2023 & March 2023

- Gained insight into software development workflows, agile methodologies, inside a team of ten within a leading digital services company.
- Executed simulated real-world developer assignments, including user story planning, testing, and problem-solving.
- Engaged with IT professionals across 3+ departments to learn about software engineering and consultancy career paths.
- 24/02/23 Certificate | 10/03/23 Certificate

Movie House Cinemas (NI)

Cinema Crew Member

Belfast, United Kingdom

March 2023 – Present

- Delivered excellent customer service to 100+ customers per shift in a fast-paced environment, handling ticket sales, food and beverage orders, and customer queries.
- Managed operations for 14 screens per shift, performing screen checks, cleaning, and ensuring compliance with safety protocols.
- Collaborated with a team of 6-8 to ensure efficient operations during high-traffic times, including premieres and holidays.

PROJECTS

BoxBoxd - Social Formula 1 Review Platform | *React, MongoDB, tailwindCSS, JavaScript*

June 2025 – Present

- Built a full-stack web app where users can review Formula 1 races and seasons, browse historical data, and follow other user profiles.
- Implemented frontend using React (Next.js) and TailwindCSS; backend operated via Express and MongoDB.
- Features include profile pages, race and season review pages, persistent favourites, and dynamic routing.
- Live Site | Frontend | Backend

TheFastestSector – Formula 1 Blog Platform | *React, TailwindCSS, JavaScript, Supabase*

May 2025 – Present

- Built an interactive frontend blog platform covering Formula 1 news, race previews, and historical insights with live data integration.
- Implemented an admin panel with authentication to allow content creators to write, edit, and publish blog posts via Supabase and QuillJS.
- Incorporated the Ergast API to fetch and display 1000+ race and driver records, including standings, results, and schedules.
- Designed a responsive and modern UI using TailwindCSS, styled to reflect the branding of contemporary Formula 1 media.

- [Live Site](#) | [GitHub](#)

- Photo Phantom Scavenger Hunt - HackNotts 24** | *Python, Pygame, Pillow, Tkinter* October 2024 — 24 hours
- Developed an interactive game that processes user-uploaded images into Halloween-style pixelated maps using Pillow for image processing and thresholding.
 - Integrated the core gameplay in Pygame with animated sprite movement, time-based challenges and collision detection with collectables and map terrain.
 - Designed a map generation pipeline using erosion and Pillow dilation to create procedurally generated maze maps from user images.
 - [GitHub](#)

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, HTML/CSS, Java, Python, C, SQL (SQLite), ARM Assembly, Haskell, LaTeX, JSON, Markdown

Frameworks: React, JUnit, GitHub Pages, Discord API, Supabase, MongoDB, Next.js, Vite, Pandas

Developer Tools: Git, Gradle, VS Code, IntelliJ, Eclipse, Vercel, Render, Postman
